Imperial College London

Department of Electrical and Electronic Engineering

Final Year Project Report (DRAFT)

Project Title:	**A High-radix Online Arithmetic Verification System**
Student:	**Zifan Wang**
CID:	**01077639**
Course:	**EEE4**
Project Supervisor:	**Dr. James J. Davis**
Second Marker:	**Dr. Christos Bouganis**

Abstract

Nice abstract

1 Introduction

2 Background

3 Requirements Capture

4 Analysis and Design

I built a delay tester to find out the delay of the DUT. With a 3-bit counter as shown in the timing diagram, it can measure this delay for up to 8 clock cycles.

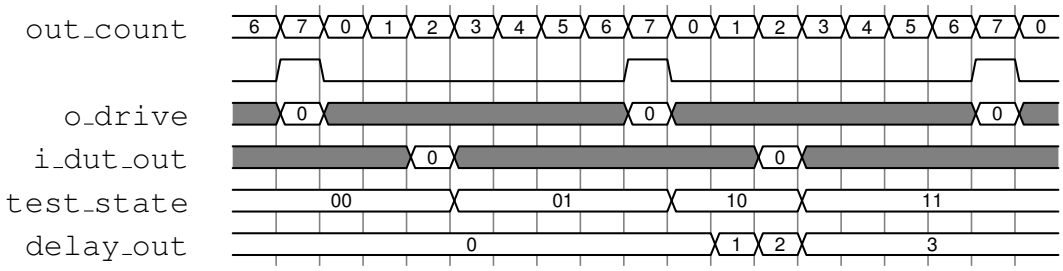

Figure 1: 3-bit Delay Tester FSM

Testing with 0 is safe since LSFR will never output 0.

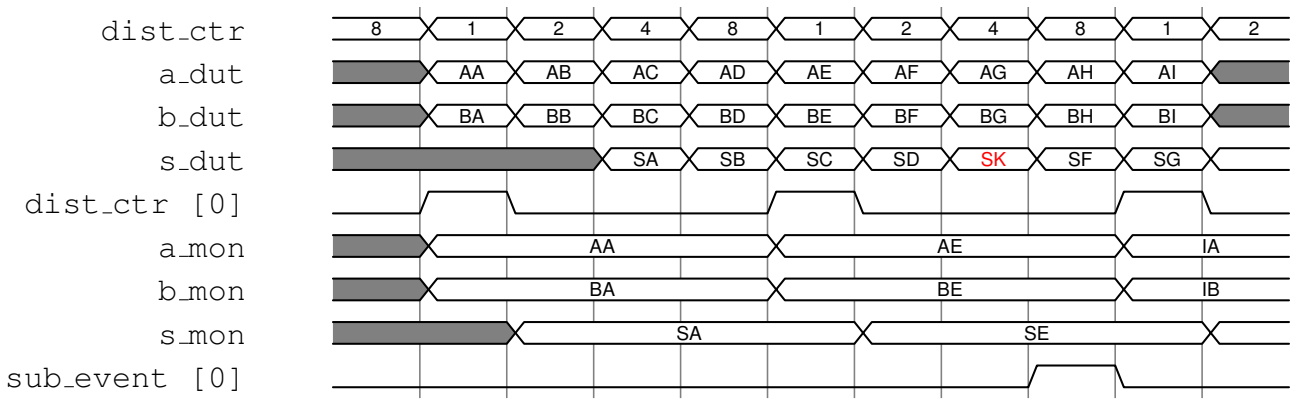

Figure 2: Distributed Monitoring System

5 Implementation

6 Testing

7 Results

8 Evaluation

9 Conclusion

10 Further Work

11 User Guide
